

SchrockTM
boutique series

DOOR STYLES & FINISHES

A kitchen scene featuring a Schrock Boutique Series range and white cabinetry. The range is a light blue color with a silver arched hood and a control panel with three dials. It is set against a brick wall. To the right of the range are white cabinets with drawers and doors, all featuring brass handles. The countertop is a light-colored wood. On the counter, there is a small black teapot, a bowl of lemons, and a vase with greenery. The floor is made of wide-plank wood.

SHERWIN-WILLIAMS®

With more than 2000 paint colors available from the Sherwin-Williams color palette to enhance your Maple, MDF or Quartersawn Oak door style, you'll be sure to find a color that is beyond ordinary. Layer a Penned Glaze or Brushed Finish for a true artistic interpretation. Please see your designer for details and exclusions.

Penned Glazes for Paints*

Outside Edge Door Profile Options

Every Boutique™ Series door style offers several outside edge profiles to tailor your look. It's amazing how seemingly small changes make such a drastic difference in the appearance of a door. From simple and straight to traditionally detailed, check which options are available on the styles you love and select the shape that suits your vision.

PROFILE #10

PROFILE #12

PROFILE #17

PROFILE #18

sheen Options

A choice in sheen can significantly transform the appearance of a door, especially those finished with medium to dark paints and stains where matte finishes are more noticeable. We have paired a Standard Sheen (top) with our Matte Sheen (bottom) on this Shaydon Cherry Mustang door to illustrate the difference. Matte Sheen is available on all paints and stains.

Standard Sheen v. Matte Sheen

Aging Techniques

Timeworn

This light distressing technique features random wormholes, tiny dents and light signs of wear to mimic the appearance of imperfections similar to those found on antiques.

Wormholes Dents Wear
Shown on painted finish

Wormholes Dents Wear
Shown on stained finish

Hewn

This subtle technique mimics finish wear that naturally develops over time, and features a continuous but light sand-through along the sharp profiles to highlight the distinctive details of each door and drawer front. Sand-through may vary in thickness around the perimeter of a single door and throughout the kitchen.

Light Sand-through
Shown on painted finish

Light Sand-through
Shown on stained finish

Extra Timeworn

This more aggressive technique includes random rasped corners and edges, wormholes, mars, splits, gouges, small dings and dents for an authentically worn look.

Wormholes Dents Rasping Mars & Splits
Shown on painted finish

Wormholes Dents Rasping Mars & Splits
Shown on stained finish

Extra Hewn

This more aggressive technique features burnished sand-through on corners and raised profiles along with sanding on sharp profiles to expose underlying wood. Unlike Hewn, Extra Hewn is a RANDOM sand-through technique varying the number of corners and raised profiles receiving burnished sand-through and the sanding of sharp profiles. As with normal aging, the worn edges will vary within individual doors and throughout the entire room.

Aggressive Sand-through
